

# Keep collaborating. Responsibly.

€1.5  
/user/month

An average company of 1000 employees shares over 100,000 files externally each year, exposing itself to risks like data breaches and non-compliance penalties - a ticking security bomb!

Tricent addresses this critical need by automating file-sharing governance within Google Workspace.

It ensures that files are not shared with external parties indefinitely, significantly reducing the risk of unauthorized access and data leakage.

With Tricent you safeguard your sensitive information, maintain regulatory compliance, and foster a secure collaborative environment.

[TRY INTERACTIVE DEMO](#)

Tricent was created with the help and feedback of Google themselves, as well as some of the biggest banks in Scandinavia. As a result, Tricent integrates flawlessly with the Google Workspace platform.

## Why Tricent?

- Get a clear overview of your externally shared files >
- Stop sharing with risky domains >
- Stop sharing with old vendors >
- Regularly remove access to externally shared files using automation >
- Increase data-sharing risk awareness >
- Keep track of unusual sharing behavior >

Financial sector **LUNAR**

"We had a bunch of shared files, that we wanted to be 100% in control of."

Online betting **BETTER COLLECTIVE**

"External file-sharing is great, but it's also dangerous. [To stay safe] we just have to clean up after a project is over."

FMCG **Nordward**

"[Thanks to Tricent] we don't have a legacy trail of old data being accessed by parties we aren't aware of."
